What is surface dressing?

- Surface dressing involves using bitumen emulsion on the carriageway and then spreading chippings over the entire road surface from kerb to kerb.
- We return to sweep away any loose chippings three times - usually 24 hours and 48 hours after the initial work and then again seven days later.

Information for residents and businesses

Sandy Lane will be closed whilst we carry out works on the extents shown.

There will be a signed diversion route in place.

We will make sure you can get to and from your house or business but there may be times when delays are unavoidable. Talk to a member of our staff on site if you need help – talking to our staff can solve most issues.

- This type of work is weather dependent and bad weather means the work will be rescheduled.
- Please keep the road free from parked cars. Please park elsewhere on the day we’re working otherwise your vehicle may be towed away.
- If we’re unable to work on the date on the front of this leaflet please make sure the road is left clear of vehicles the following working day.
- You can park on the road once the surface dressing is completed and you don’t have to park elsewhere when we sweep the loose chippings.
- For a few days after the work and during prolonged spells of hot weather, the surface may still be sticky and could easily be carried into your home on shoes. This can easily be removed using white spirit or Eucalyptus oil.
- Any road markings will not be able to be replaced until after the final sweep has taken place.

If one of our signs has been left behind, please help us by reporting it.
