### How we prioritise roads for maintenance works

Road maintenance works are prioritised using a number of different criteria including traffic volumes, types of usage, condition of the roads and insurance claims. These priorities are based upon inspections, surveys, known defects, customer complaints and accident data.

This information ensures the funding is used on the roads and pavements that are in the greatest need of treatment in a fair and consistent manner across the county.

More information on our prioritisation policy and criteria can be found on our [Prioritisation page](#).
