

P25-044 UPDATE TO POSITION STATEMENT

[Major Planning Development Proposals - Normandy Parish Council](#)

25 September 2025

Normandy Parish Council continues to prepare for the arrival of some major planning applications within the village by actively monitoring potential developments, understanding the changes to the National Planning Policy Framework, gaining expert insight by working with a Planning Consultant maintaining open dialogue with stakeholders and residents and participating in public consultations. The Council remains focused on gathering community feedback, addressing infrastructure concerns, and analysing environmental impacts.

Alongside preparations for the Taylor Wimpey application, the Council is also strengthening its approach to all future significant planning proposals by updating its procedures and focusing on transparent community representation. Residents' views will be sought through a forthcoming village-wide consultation, ensuring the Council's advocacy truly reflects the wishes and priorities of the local community with regard to large-scale developments in Normandy.

Matters for consideration

The link will take to you to our current position statement, does the council agree with the specifics of this addition?
