

EF26-022 Conservation Working Group

We have a Work Party on Saturday 25th July to remove non-native species from the area opposite Quinta Cottage. These are garden escapees that are only visible in summer and require digging out. However, with the lack of rain digging may be a challenge too far! So, in consultation with Bill Stanworth, our botanical and ecological advisor, the work party may change to removal of the non-native and highly invasive pond weed and other pond-related work. Will aim to decide this on Friday 17th so can let all volunteers know the change of plan.

The final butterfly survey is on 1st August (Sat) and again all are welcome to join.

The conservation stall will be up at MFF on Friday. Thank you to the councillors who have agreed to help with this.
